#### 1. Uvod

#### 1.1 Korišćeni programski jezici i tehnologije

Za izradu sajta korišćen je Laravel, PHP, HTML, SASS/CSS, JavaScript/jQuery i XML(sitemap). Radno okruženje Visual Studio Code.

#### 1.2 Opis funkcionalnosti

Sajt predstavlja veb aplikaciju za naručivanje hrane iz različitih restorana u ponudi

- Registracija I logovanje sa validacijom na klijentu I server
- Zaštita stranica uz pomoć middleware-a
- Dinamičko ispisivanje menija, restorana i najzastupljenih kategorija proizvoda u njima i samih proizvoda
- Pretraga restorana na početnoj stranici pomoću ajax-a
- Filtriranje I sortiranje I paginacija restorana pomoću ajax-a
- Filtriranje I sortiranje I paginacija proizvoda svakog restorana pomoću ajax-a
- Dodavanje proizvoda u korpu (porudžbinu) I izmena korpe pomoću ajax-a
- Slanje mejla administratoru preko kontakt forme
- Uvid u bitne statistike sajta u admin panel-u
- Izveštaj o ključnim aktivnostima korisnika u admin panel-u
- Mogućnost upravljanja sadržajem sajta u admin panel-u
- Resize slika pri upload-u uz pomoć Intervention Image-a

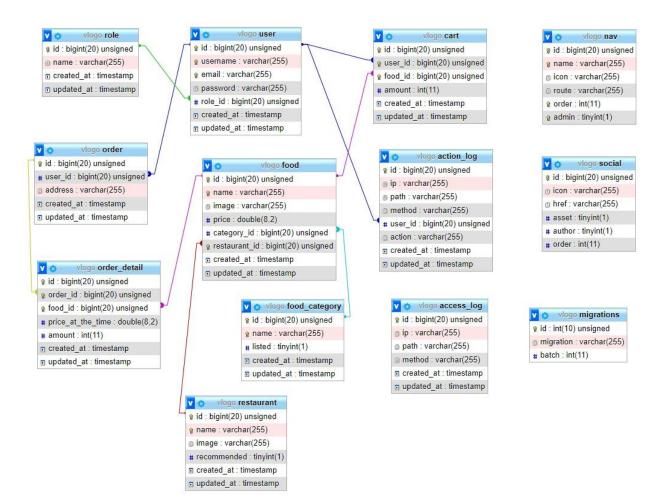

#### 1.3 Template

Korisnički deo: Nije korišćen template

Admin panel: <a href="https://adminite.io/">https://adminite.io/</a>

### 2. Organizacija

### 2.1 Dizajn baze podataka

#### 2.2 Mapa sajta

```
<?xml version="1.0" encoding="UTF-8"?>
   <url>
       <changefreq>monthly</changefreq>
   </url>
   <url>
   </url>
   <url>
   </url>
   <url>
       <changefreq>yearly</changefreq>
   </url>
</urlset>
```

# 2.3 Slike stranica i opis funkcionalnosti

/ ili /home

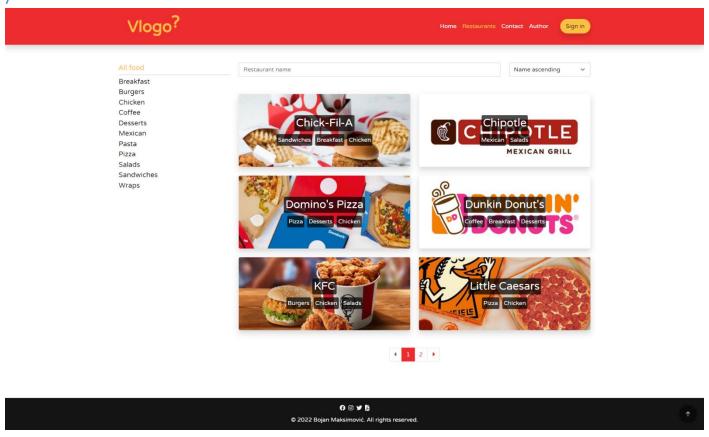

Recommended by Vlogo

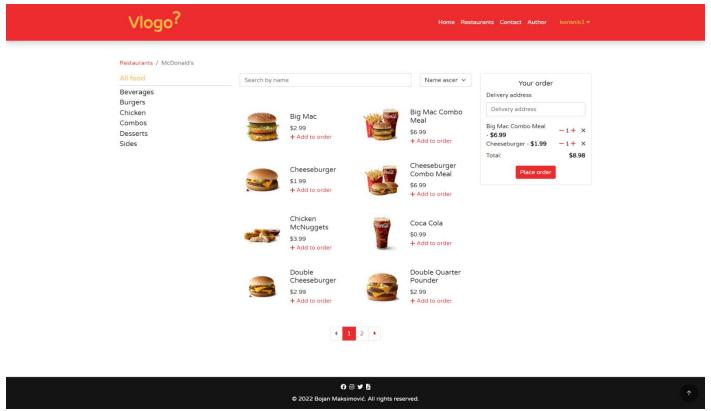

Na početnoj stranici korisnici imaju mogućnost pretrage restorana u ponudi uz pomoć ajax-a. Na ovoj stranici se takođe ispisuju neki od restorana koje vlasnici sajta preporučuju.

### /restaurants

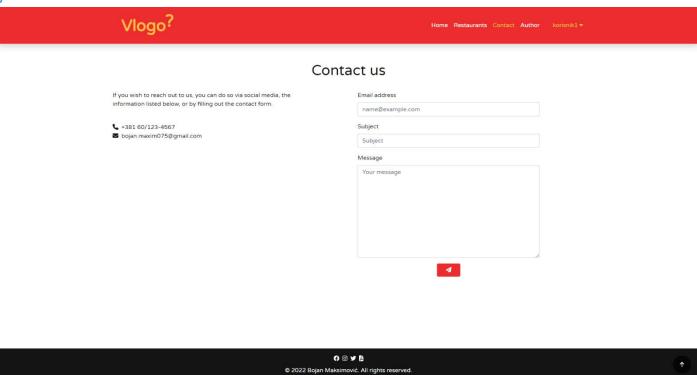

Na stranici restaurants je odrađeno filtriranje, sortiranje i paginacija restorana uz pomoć ajax-a.

#### /restaurants/{id}

Na ovoj stranici ispisuju se sve kategorija proizvoda unutar izabranog restorana I svi proizvodi koji pripadaju njemu. Takođe je omogućeno filtriranje, sortiranje I paginacija proizvoda kao I to da korisnik može da dodaje proizvode u svoju porudžbinu I da ih menja. Sadržaj porudžbine se čuva za svaki restoran zasebno jer korisnik ne može u jednoj porudžbini da naruči proizvode iz više restorana. Ova stranica je zaštićena middleware-om koji proverava da li je korisnik ulogovan.

#### /contact

Na kontakt stranici se nalazi forma za kontaktiranje administratora sa proverom na klijentskoj I serverskoj strani. Ako je provera uspešna administratoru se podaci šalju na mejl.

Bojan Maksimović 92/19

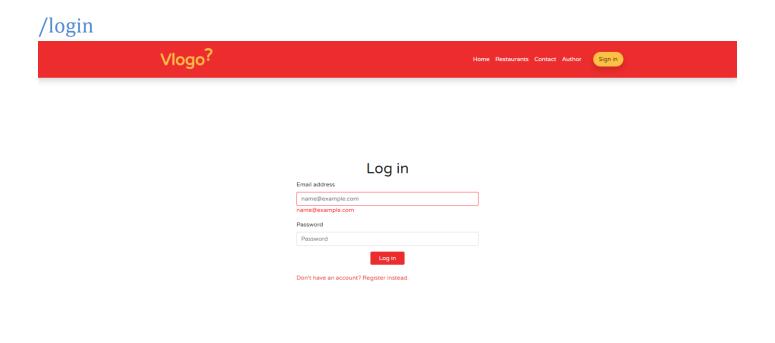

#### About me

Hello! I am Bojan, an aspiring back-end web developer. I'm a driven individual with the ability to learn and collaborate in rapidly changing environments and compositions. I am eager to tackle web development challenges to achieve lasting impacts on user experience.

Portfolio Website

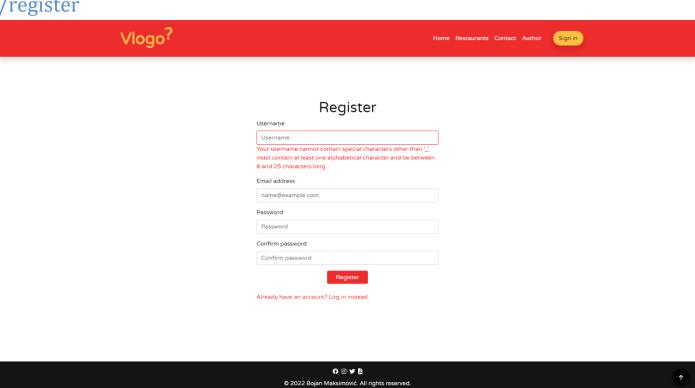

Stranica sa slikom I nekim podacima o autoru.

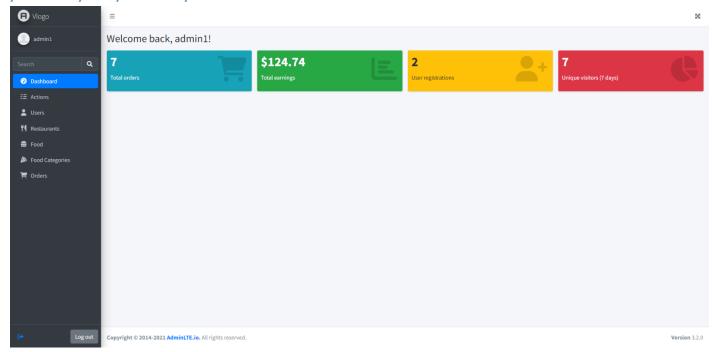

Stranica sa formom za logovanje kao I linkom koji vodi do stranice za registrovanje. Podaci iz forme se proveravaju na klijentu I serveru. Stranica je zaštićena middleware-om koji proverava da korisnike NIJE ulogovan.

Stranica sa formom za registrovanje kao I linkom koji vodi do stranice za logovanje. Podaci iz forme se proveravaju na klijentu I serveru. Stranica je zaštićena middleware-om koji proverava da korisnike NIJE ulogovan.

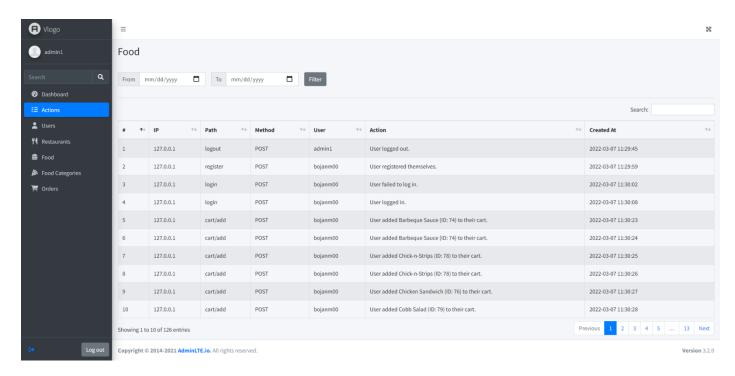

### /admin/ ili /admin/dashboard

Kao I sve stranice u admin panelu, stranica je zaštićena middleware-ovima koji proveravaju da je korisnik ulogovan I da je uloga tog korisnika 'admin'.

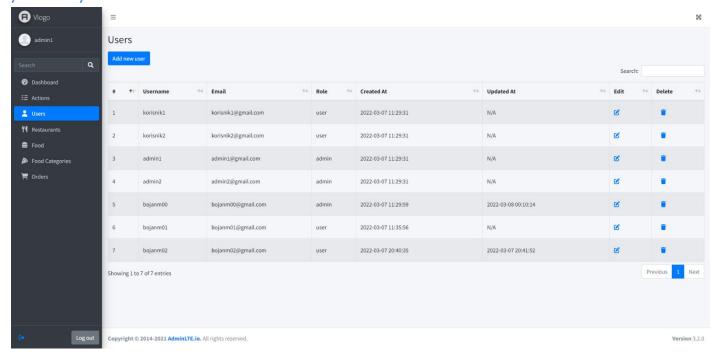

Na ovoj stranici korisnik ima uvid u neke ključne statistike sajta kao što su: broj porudžbina, totalna zarada, broj registracija i broj jedinstvenih posetioca u poslednjih 7 dana.

### /admin/actions

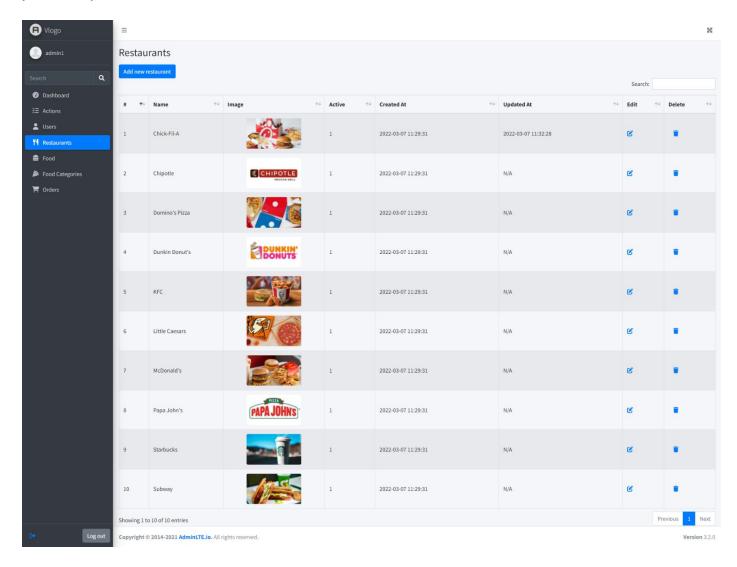

Na ovoj stranici korisnici mogu da vide izveštaj o ključnim aktivnostima svih korisnika kao i da filtriraju ispisane aktivnosti po datumu.

### /admin/users

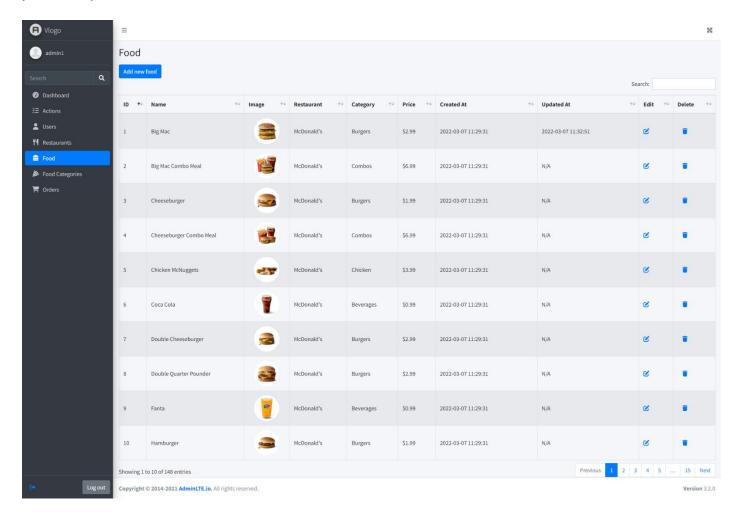

Na ovoj stranici korisnici mogu da vide sve registorane korisnike na sajtu, da ih menjaju, brišu ili da dodaju nove. Ako korisnik izmeni svoje podatke, sajt će ga izlogovati.

### /admin/restaurants

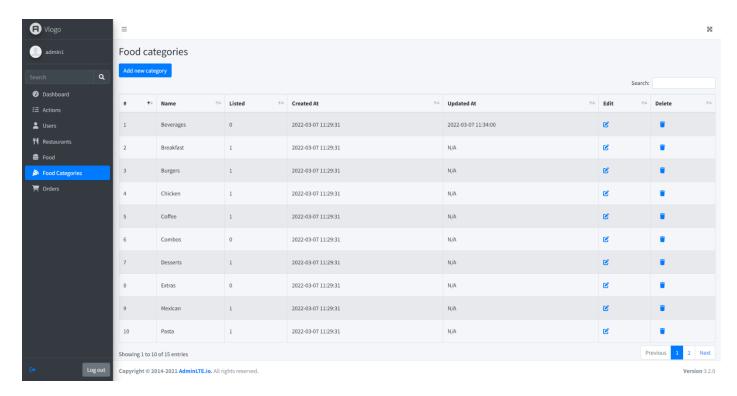

Na ovoj stranici korisnici mogu da vide sve restorane, da ih menjaju, brišu i da kreiraju nove. Pri dodavanju novog restorana ili izmeni postojećeg, uploadovana slika se resize-uje.

### /admin/food

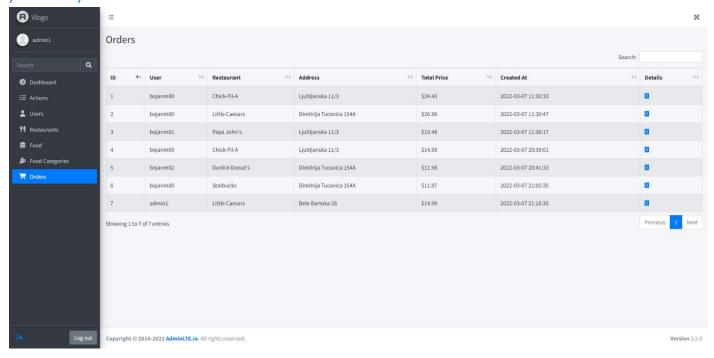

Na ovoj stranici korisnici mogu da vide sve proizvode iz restorana, da ih menjaju, brišu i da kreiraju nove. Pri dodavanju novog proizvoda ili izmeni postojećeg, upload-ovana slika se resize-uje.

### /admin/categories

Na ovoj stranici korisnici mogu da vide sve kategorije proizvoda, da ih menjaju, brišu i da kreiraju nove.

### /admin/orders

Na ovoj stranici korisnici imaju uvid I sve porudžbine. Mogu da kliknu na ikonicu za detalje da vide šta je sve bilo poručeno.
